Swedish - Basic

PROFILE

Fullstack developer with practical experience in building cross-platform applications using React Native, TypeScript, and JavaScript.
Experienced in developing production-level features including API integration, authentication, and structured data handling. Worked with both frontend and backend technologies, including Node.js and database systems.
Strong focus on building scalable, maintainable applications and improving user experience through clean architecture and efficient logic.
Currently developing a real-world mobile application as part of a startup project.

WORK EXPERIENCE

Intern at Ligh IT **2021**

- Developed responsive website layouts using HTML, CSS, and JavaScript
- Fixed bugs and improved performance of existing codebase
- Created structured reports and documentation for development tasks

Accelerator Winner and App Development **2024**

- Developed a mobile application as part of a hackathon project, focusing on full application logic and implementation
- Built core features using React Native, including user flows and interactive components
- Collaborated on product concept and UX design, contributing to a solution that won the competition

Work in GlobePerson & GlobePatient (Swedish company HEdVC) 2025-03.2026

- Developing a cross-platform mobile application using React Native and TypeScript in a Swedish company
- Implementing frontend features including UI components, state management, and user interaction logic
- Integrating frontend with backend services via REST APIs, ensuring reliable data flow and synchronization
- Working with Node.js (Express) to handle backend logic, API endpoints, and database communication
- Debugging and improving application performance and stability across different devices

EDUCATION

Bachelor's degree in specialty "Software Development" **2020-2024**

Zaporizhzhya National University

Course: Full stack developer **2023-2024**

IT school Mate Academy

Main stack: HTML, CSS, JavaScript, React Native

Master of Science in specialty "Computer Science" **2024-2025**

National Technical University "Kharkiv Polytechnic Institute", Ukraine
Specialization: Mathematical Modeling and Intelligent Computing in Engineering
Educational Program: Computer Science - Modeling, Design, and Computer Graphics
